

The Basic Policy on Information Security Measures of the Public University Corporation, the University of Aizu

Article One

(Purpose)

The Public University Corporation, the University of Aizu (hereinafter referred to as “the UoA”) implements information security measures targeting the information and information systems handled at the UoA in order to achieve its principles and missions.

Article Two

(Policy)

In order to achieve the Purpose stipulated in Article One, the UoA shall, in addition to complying with related laws, etc., and considering rights, etc., take the following measures according to the Basic Regulation Concerning Information Security Measures of the Public University Corporation, the University of Aizu (hereinafter referred to as “the Basic Regulation”) and other regulations.

- (1) Arrangement of an Implementation System for Information Security Measures
- (2) Arrangement of Related Regulations, Implementation Procedures, etc.
- (3) Protection of Information and Information System
- (4) Management and Operation of Information Systems and Information Services
- (5) Handling of Information Security Incidents
- (6) Enlightenment and Education of Users
- (7) Implementation of Information Security Management Including (1) through (6)

Article Three

(Duty)

Those who use information possessed by the UoA or information systems handled by the UoA and those engaged in management and operation of the information systems must comply with the stipulations of this Basic Policy, the Basic Regulation, and other related regulations, etc.

Article Four

(Dealing with Infringements)

Infringements of regulations, etc. set forth according to this Policy will be handled in accordance with each regulation and other regulations, etc. set forth by the UoA.

Additional Provisions

This regulation shall be enforced as of April 1, 2021.
