

Minimize the following finite automata.

1. Minimize the following DFA

2. Minimize the following DFA

3. Minimize the DFA,  $M=(Q, \Sigma, \delta, q_0, F)$  with

$$\begin{aligned}
 Q &= \{q_0, q_1, q_2, q_3, q_4, q_5, q_6, q_7\} \\
 \Sigma &= \{0, 1\} \\
 F &= \{q_3\}, \text{ and } \delta \text{ is defined by}
 \end{aligned}$$
