

The Template for Graduation Thesis

Taro Aizu s1xxxxxx

Supervised by Prof. Jiro Fukushima

Abstract

The abstract of your thesis must be written here.

1 Introduction

This document is a template for \LaTeX . If you want to write your thesis using \LaTeX , please follow this template.

2 Method

2.1 Graduation Thesis

“GT01 Graduation Thesis” is a required course offered for fourth-year students on a year-round basis to which eight units of academic credits are allotted. This is the only required course offered on a year-round basis at the university. This is the most important course, and it integrates what students have studied at the university for four years.

Students must conduct their research on their own initiative to complete their graduation theses under thorough supervision based on individualized instruction given by relevant supervisors.

The University has obliged all students to write their graduation theses in English since the university was established, and this is one of the reasons that graduates of this university have gained a high reputation from various quarters.

Certain requirements must be fulfilled in order to initiate a graduation thesis, and due procedures must be taken for acquisition of the academic credits for this course.

2.2 Review of Graduation Thesis

Graduation theses shall be reviewed by a relevant supervisor and one referee, two referees in total.

The ratio between the weights of evaluation conducted by the supervisor and the referee is two to one.

Comprehensive evaluations will be conducted, taking into consideration the items below.

- Difficulty level of the graduation thesis theme
- Quality of the thesis written in English (regarded as an official record), including its content and expressions
- Student’s attitude and persuasiveness during the thesis presentation
- Accuracy of responses to questions

- Student’s enthusiasm and stability while working on their graduation thesis

2.3 Submission of Completed Theses

The length of a graduation thesis must be from four to eight pages of A4-sized paper.

A brief compilation of four to six pages is a length that is regarded as appropriate for papers in the field of science and engineering.

Printed theses are kept in the university library, and electronic versions are stored in a particular directory, so that graduation theses can be read at any time.

3 Examples

3.1 About Figures and Tables

If you want to use figures and tables to explain your thesis, insert them in a proper size. Each figure and table must have a title (caption) and number (e.g. Figure 1 and Table 1). The caption font size should be 8 pt.

Figure 1. Logo

Table 1. Example of Table.

ID	Name	Detail
1	One	1, One, Un, Eins, Uno
2	Two	2, Two, Deux, Zwei, Due
3	Three	3, Three, Trois, Drei, Tre

3.2 About References

All references must be numbered and citations of references in the body text should be identified by a number in square brackets (e.g. [1], [2]).

Acknowledgement

This section is optional, but a polite way to thank others for their assistance. If you want to show gratitude, this section should be included.
